M/V Ryan Chouest - Cruise 01 through 15

June-September 2010

This folder is a data product created by the Commonwealth Scientific and Industrial Research Organization (CSIRO) which comprises Microsoft Access databases, photos, documents and other information products collected onboard the M/V Ryan Chouest - Cruises 01 through 15 in response to the MC252 BP-Deepwater Horizon oil spill event.

A potential problem was encountered when opening hyperlinks in the database ObsLogs_Data.mdb. Several tables contain hyperlink fields that open documents contained in the LinkedFiles folder. When using a computer with Windows XP operating system and MS Access version 03, the links opened. When using a computer with Windows 7 operating system and MS Access version 10, the pop-up windows were blocked for links to *.jpg files.
