Good morning Kathy,

Excellent results on the run of the validation report for the FLDEP database (project #1130). All the issues with Analytes and Analytical methods were resolved. All the outstanding issues for Datum, MDL, MDL_Units, Date_Collected and Samp_Depth are noted as exceptions based on your email from June 24th. A copy of this last report is attached.

We will be placing a copy of the database (version 76; 062711) with the other Deepwater Horizon Scribe databases. This collections, along with documentation about the content and validation tests will be archived at a NOAA Data Center.

Thank you again for all your help with this Clean-up effort.

Julie
