

Sensitivity of Coastal Environments and Wildlife to Spilled Oil

AMERICAN SAMOA

Supported by:

National Oceanic and Atmospheric Administration
National Ocean Service
Office of Response and Restoration
Hazardous Materials Response Division
Seattle, Washington

The American Samoa ESI atlas was undertaken as part of NOAA’s Coral Reef Conservation Program designed to protect and restore the Nation’s Coral Reefs and assist conservation of reef ecosystems internationally. This program includes efforts to monitor and assess coral health, map coral reef ecosystems, conduct research to better understand biological, social and economic factors which affect coral reefs, partnerships to reduce the adverse effects of fishing, coastal development and pollution, and identify coral reef areas for special protection.
