Ingrid,

I think having this note is fine. We'll indicate it as an exception.

Thanks for looking into this.

Julie

Tobar, Ingrid said the following on 5/2/2011 2:00 PM:

Hi Julie,

The lab results we received from the National Park Service do not indicate the depth of the sample (see attached).

This sample was taken from a well. Do you need any additional information?

Thank you,

**Subject:** Re: NPS database validation report

Ingrid,

Attached is the latest validation report for the NPS database.

Only one issue! A sample depth.

Please let me know if/when this is corrected. If not, send me a note as to why it is an exception.

Thanks for taking care of all of this so quickly.

Julie
